

Seminar: Topics in International Trade

For this year's seminar we picked recently published papers on relevant topics and debates in the field of international trade. Other scientific literature needs to be researched and included in the seminar paper for a comprehensive discussion of the topic discussed in the respective paper.

Some of the papers in the following list are rather technical. Still, we expect you to grasp the main idea of the paper, the underlying intuition, and the key mechanisms important for the respective analysis. These should be in the focus of your seminar paper, and also (even more so) of your seminar presentation. In preparing for the latter, please keep in mind that the presentation has to be comprehensible to your fellow students.
